

# Emergency Responder Training

A Seminar for Firefighters, Police, 911 Operators & Emergency Management Personnel

The purpose of the course is to instruct first responders how to eliminate or control potential hazards related to power-line or natural gas emergencies. This interactive 3-1/2 hour presentation includes:

- A live demonstration showing the characteristics of natural gas and high-voltage electricity
- How to identify and manage a variety of emergency situations involving PSE facilities
- An overview of PSE's response coordination and procedures

Classes are being held on the dates listed at the following locations:
